PREFACE.

The publication of a handbook of learned societies was one of the projects recommended to the Carnegie Institution by its Advisory Committee on Bibliography (see Yearbook, no. 1, 1902, p. 182-184). This was approved by the Trustees, and grants were made for the purpose, the expenditure and supervision being entrusted to the Librarian of Congress. After consultation with the authorities of the Carnegie Institution the organization of the work was placed in charge of Mr. J. David Thompson of the Library Staff, who has personally edited this volume and seen it through the press, the material having been compiled under his direction by Mrs. Lucy C. Daniels Thompson, assisted by Miss Mary F. Griffin.

The present volume, devoted to America, was completed for publication first, because printed information for this region is less available. Pending decision as to further publication, the remaining material relating to societies and institutions in the Old World will, for the present, be kept on file available for consultation at the Library of Congress.

HERBERT PUTNAM,

Librarian of Congress.

INTRODUCTORY.

The scope of this manual may be defined by indicating the geographical
region covered, the classes of societies and institutions included or excluded,
and the information presented regarding each organization described.

The present volume relates to North and South America and the adja-
cent islands, including, however, also the American schools at Athens and
Rome, and in Palestine, which are associated with the Archaeological Insti-
tute of America. Similar material for the rest of the world has been collected
but is not yet edited for publication.

With the exceptions noted below, it has been our aim to include all
active publishing societies, together with universities, colleges, museums and
laboratories issuing contributions to knowledge, and institutions devoted to
research. In the case of national scientific societies, however, the test of pub-
lication has not been applied, and many local historical societies in North
America which do not publish have been briefly noted under the various states
and provinces. The plan of the investigation, as approved by the Trustees of
the Carnegie Institution, provided for the omission of societies and institutions
dedicated to medicine\(^a\) and agriculture\(^b\); and as the work progressed it was
found necessary to exclude also patriotic societies, local bar associations\(^c\)
and teachers' organizations\(^d\), and leagues for civic improvement or charitable
purposes. Astronomical and meteorological observatories\(^e\) have been in-
cluded only when forming departments of universities, colleges, etc.

The following outline, accompanied by a circular letter requesting the
necessary data, was sent to all organizations known to us within the scope
of the Handbook and will serve as a description of the information here
published:

1. Name.—Full official name of the society or institution at the present time.
2. Address.—Permanent postal address, with name of permanent official (if any) to
whom communications should be sent.
3. History.—Brief notes, including dates of foundation and incorporation, changes of
name or organization (e.g., fusion with other societies), and any other important
events, together with bibliographical references to any published sources of fuller
information.

catalogue of the Library of the Surgeon general's office, U. S. Army, [1st series] v. 10
and 2d series, v. 12—Periodicals (medical and scientific).

4. **Object.**—Statement given in the constitution or act of incorporation.

5. **Meetings.**—Time and place.

6. **Membership.**—Number of members, classed as active, honorary, corresponding, &c., with entrance fee and annual dues paid by each.

7. **Serial Publications.**—Exact title of each serial publication issued by the society or institution since its foundation, and a statement for each series of such publications giving change of title (if any), number of volumes (or brochures), period covered, place and dates of publication, and size.

   Where the present society has been formed by fusion of earlier societies, a similar statement regarding the serial publications of each of these is desired.

   If a publication is now, or has been, issued jointly with other societies, this fact should be noted.

   The content of each serial publication should also be noted, if not clearly defined by its title or by the statement of the object of the society.

8. **Special Publications.**—If a published list exists, kindly refer to it or send a copy if one can be spared.

9. **Distribution of Publications.**—(a) Conditions of exchange (b) price-list and place of sale.

10. **Research Funds and Prizes.**—Under each fund, a statement as to the special field covered, the amount and conditions of grants in aid of research or conditions of competition in the case of prizes.

   In brief, the Handbook may be said to supply, in regard to societies and institutions, information similar to that contained in bio-bibliographic reference works for individual authors. In contrast with "Minerva," which is primarily a yearbook of learned institutions (though including also the principal learned societies), and which by reason of its annual issue is able to furnish up-to-date information as to the variable personnel, annual budget, etc., chief importance has been attached in this work, which is principally a handbook of learned societies (including also certain classes of learned institutions), to the information of permanent value, viz.: history, publications, and special funds from which grants are made in aid of research or prizes offered for results attained.

   The material furnished in response to the above circular and supplementary inquiries has been verified from printed sources wherever possible and the serial and special publications of societies and institutions included have been examined as far as they were available in the Library of Congress and other government libraries in the District of Columbia. As a further precaution to secure accurate and adequate statements, portions of the galley proof were sent to the secretaries and librarians of many of the principal societies in the United States and Canada for additions and corrections.

   To all officers of societies and institutions who have contributed information relating to the organizations which they represent, for use in the preparation of this Handbook, we desire to express our sincere appreciation of their kind cooperation. We are especially indebted to many secretaries of State historical societies for notes in regard to the local historical societies in their respective states; to Mr. R. W. McLachlan, Hon. Curator of the Numismatic and Antiquarian Society of Montreal, who furnished a list of Canadian societies and assisted in the collection of information about those
in Montreal and Quebec; to Mr. Luis M. Perez, of Havana, who revised the Cuban material; to the American diplomatic representatives in Central and South America, who, through the courtesy of the Department of State, communicated with the learned societies and institutions in the countries to which they were accredited and forwarded the information supplied; to Dr. H. von Ihering, Director of the Museu Paulista, São Paulo, Brazil, who supplied the data relating to that state.

In the use of a reference work of this character, it is important to notice at the outset the arrangement of the material it contains. A glance at the table of contents will suffice to show that the primary division is by countries in the order there indicated. Under each country, the national societies or those without fixed headquarters or meeting place (and, in the case of the Latin American republics, also the societies and institutions of the capital city) are placed first, alphabetically by official name; and the local societies and institutions follow, entered by city or state according to the plan described in a note at the head of page 97. If the information required is not found immediately, reference should be made to the index where the names of societies and institutions, serial publications, research funds, prizes and medals, expeditions, cities, counties and states are arranged in a single alphabet, together with subject headings under which are collected the references to all organizations or serial publications treating of a particular region of knowledge or special subject.

As the final proof of the early pages of this volume was read over a year ago, the "additions and corrections" (p. 548-562) form an integral and essential part of the book and should be consulted in connection with the body of the text, with which they are indexed.

UNITED STATES.
NATIONAL SOCIETIES.

Actuarial Society of America.

Address.—32 Nassau Street, New York City. Secretary: Arthur Hunter.

History.—Founded Apr., 1889.

Ref.: Papers and transactions, v. 6, no. 21 (decennial number), p. 117-135.

Object.—Promotion of actuarial science.

Meetings.—Annual meeting on 1st Thursday after the 14th day of May, in New York City. A second meeting customarily held each year in the autumn, at such date and place as may be decided upon by the council.

Membership.—120 fellows (annual dues, $10 in America, $5 in other countries); 29 associates (annual dues, $5). Membership at first confined to the official and assistant actuaries of life insurance companies, together with a few persons not connected with companies, but eminent in the actuarial profession. In 1898 a class of associates was formed, composed of persons engaged in actuarial pursuits and looking forward to future membership in the society. Admission to this class by examination.

Publications.

v. 1-6 have title Papers and transactions. Price: 50c. per number.

Report of committee on specialized mortality investigation. 1903.

Large edition, containing the details of the work, price, $6; small edition, containing results only, price $2.

Distribution.—Exchange limited. On sale by the Secretary.

Agassiz Association.

History.—A nature study association founded in 1875, incorporated Apr., 1892.

Membership.—About 1,000 chapters, mainly in United States and Canada; a few abroad. Entrance fee for each chapter, $1. Individuals also admitted to membership by the President on payment of 50 cents.

Publications.

Merged into “Santa Claus,” which published material of juvenile interest contributed by the association until 1890. The following periodicals have also served as organs of the association: St. Nicholas (New York, London), Nov. 1880 to Jan. 1887; Popular science news (Boston, later New York), Jan. 1890 to Jan. 1894 and Mar. 1897 to Dec. 1898; The
Observer (Portland, Conn.), Jan. 1894 to Oct. 1896; The American boy (Detroit), Mar. 1900 to Mar. 1903; Outdoor world, journal of the Agassiz association, ed. by H. H. Ballard, 1903.

See also American Fern Society; Sullivant Moss Chapter; Wilson Ornithological Club.

American Alpine Club.
Address.—Philadelphia, Pa. Secretary: Henry G. Bryant, 203 Walnut Street.

History.—First meeting held in Washington, D. C., Jan. 2, 1903.

Ref.: American Alpine Club. By-laws, list of members [and their activities, 1903-04, together with references to published accounts of ascents, explorations, etc.]. 1905.

Object.—Scientific exploration and study of the higher mountain elevations and of the regions lying within or about the Arctic and Antarctic circles; cultivation of mountain craft; promotion and dissemination of knowledge regarding the regions above indicated.

Meetings.—At least one stated meeting annually, to be held in December in Boston, New York, Philadelphia, or Washington, or at such place as may be designated for that year's meeting of the A. A. A. S. The constitution provides for a Pacific section for the purpose of holding meetings for members west of the Rocky Mountains.

Membership.—50 active (annual dues, $5; life composition, $50); 7 honorary. Limited to persons who have made ascents of one or more mountain elevations considered acceptable to the board of directors, those who have conducted explorations in the Arctic and Antarctic tracts, or contributed substantially to a knowledge of the natural phenomena of the regions included in the club's field of study, and those who are engaged in a special study of recent glacial phenomena.

Publications.

The club proposes issuing a series of monographs on Typical mountains of North America. At present its organ is APPALACHIA, pub. by the Appalachian Mountain Club, Boston, Mass. (q. v.).

Address.—Secretary: George Grant MacCurdy, Yale University, New Haven, Conn. Editor: F. W. Hodge, 1333 F Street, N. W., Washington, D. C.

Object.—To promote the science of anthropology; to stimulate the efforts of American anthropologists; to co-ordinate anthropology with other sciences; to foster local and other societies devoted to anthropology; to serve as a bond of union among American anthropologists and American anthropological organizations, present and prospective; and to publish and encourage the publication of matter pertaining to anthropology.
Meetings.—Annually in connection with the American Association for the Advance-
ment of Science.

Membership.—269 members (annual dues, $6; reduced to $5 for members of the
American Association for the Advancement of Science and the American Folk-
lore Association, and $1 for members of anthropological associations receiving
the American Anthropologist; life composition, $100); patrons ($1,000).

Publications.

Prices: in North America, $1.25 per number, $4 per annum; in other coun-
tries $1.25 per number, $4.50 per annum. v. 1-7 sold only in sets at
$3.50 per vol. in numbers.

Old series, v. I-XI pub. under the auspices of Anthropological society of
Washington (q. v.).

Contents: Tribes of the Columbia valley and the coast of Washington
and Oregon, by A. B. Lewis. v. 1, pt. 1, pub. under the title Memoirs
of the American anthropological and ethnological societies, by the Ameri
can ethnological society, New York (q. v.).

Distribution.—Correspondence pertaining to subscriptions should be addressed
American anthropologist, 41 N. Queen Street, Lancaster, Pa., or to the
Treasurer, B. T. B. Hyde, American museum of natural history, New York
City.

American Association for the Advancement of Science.

Address.—Permanent Secretary: L. O. Howard, Cosmos Club, Washing-
ton, D. C.

History.—First meeting in Philadelphia, Sept. 20, 1848, in pursuance of
a resolution adopted at Boston in Sept. 1847, by the Association
of American Geologists and Naturalists (founded 1840 as Association
of American Geologists; "and naturalists" added 1843) to resolve itself
into the American Association for the Advancement of Science; incor-
porated by act of the General Court of Massachusetts, March, 1874.
Consists of the following sections: A, Mathematics and Astronomy;
B, Physics; C, Chemistry; a D, Mechanical Science and Engineering;
E, Geology and Geography; F, Zoology; G, Botany; H, Anthro-
pology and Psychology; I, Social and Economic Science; K, Physiology and
Experimental Medicine; L, Education. A botanical club and an ento-
omological club have been organized within the association, intended
to serve as a nucleus for the gathering of all persons interested in these
sciences present at the meetings of the association. The library of the

association is on deposit in the library of the University of Cincinnati, Ohio.

The following societies are affiliated with the association, and usually meet in conjunction with it:

Object.—By periodical and migratory meetings, to promote intercourse between those who are cultivating science in different parts of America, to give a stronger and more general impulse and more systematic direction to scientific research, and to procure for the labors of scientific men increased facilities and a wider usefulness.

Meetings.—Annually at such time and place as may be determined by vote of the general committee. The recent practice has been to hold the meetings during the last week in December (convocation week); some of the sections meet in the summer also.

Membership.—1,351 fellows and 2,963 members (entrance fee, $5; annual dues, $3; life composition, $50); 17 incorporated scientific bodies holding membership; 2 patrons ($1,000); associates for a single meeting ($3); 3 honorary life members; 3 honorary fellows. A list of members is published in each volume of the Proceedings, giving full names and addresses.

Publications.

(a) The papers and proceedings of the Association of American geologists and naturalists were published in the American Journal of Science for the corresponding years. In addition, the following publications were issued:

Lettered: Transactions of the American association of geologists and naturalists. 1840-1842.

Addresses by E. Hitchcock and H. D. Rogers pub. 1841, 1844 contain also Abstracts of the proceedings 1840-41 and 1844.

Abstract of proceedings at sixth annual meeting, 1845. New Haven, 1845. 8°.

Place of publication varies greatly.
List of Proceedings, with places and dates of meetings and dates of publication, on cover of v. 55.
Include reports of the Committee on indexing chemical literature which contain lists of bibliographies published during each year or in preparation. Also separate.
An edition of the Proceedings of the Cleveland meeting, 1853 (seventh meeting), printed by the local committee, was not officially adopted, and an attempt was made to suppress it. (See p. 281-288 of the authorized edition pub. 1856.)

Prices: $1.50 per volume for the last five years ($1 to members); earlier volumes (to members only), 50c. each. Bound in cloth, 50c. per vol. extra.

Memoirs of the American association for the advancement of science.
I. Salem, Mass., 1875. 1 v. fol.

Since 1901 SCIENCE, published weekly by the Macmillan Co., New York, has been the official organ of the association and is sent to all members.

Distribution.—The Proceedings are exchanged. On sale by the Permanent Secretary.

Research funds.—The income from the permanent invested fund of the association (derived from life memberships, patrons' fees, and the surplus of the working fund turned over annually to the Treasurer) is used under the direction of the council in providing grants for research. Applications for such grants are made to the council and the funds are apportioned each year at the annual meeting.

Amount of fund (1903): $12,000.

American Association of Museums.

Address.—Secretary: George A. Dorsey, Field Museum of Natural History, Chicago, Ill.

History.—Organized at New York in May 1906. To include museums of North and South America.

Meetings.—Not definitely stated as yet. The 2d meeting is to be held in the spring or early summer of 1907, at Pittsburg at the call of the Council.

Membership.—Classed as active (persons actively engaged in the work of museums; annual dues, $2; life composition, $30); sustaining (museums contributing not less than $10 annually); associate; honorary (limited to 15); patrons.

Publications.
The association intends to issue a journal in the interest of museums.
American Association of Pathologists and Bacteriologists.

Address.—Secretary: Harold C. Ernst, Harvard Medical School, Boston, Mass.

History.—Founded in 1900.

Object.—Advancement of the knowledge of disease.

Meetings.—Annual meeting at such time and place as the council shall determine; other meetings as called.

Membership.—Limited to persons presenting evidences of acceptable and creditable research in pathology or bacteriology (annual dues, $10).

Publications.

Members receive the Journal of Medical Research⁹, Boston, Mass., edited by Harold C. Ernst and partly supported by the association.

American Bar Association.

Address.—Secretary: John Hinkley, 215 N. Charles Street, Baltimore, Md.

History.—Formed at Saratoga Springs in August, 1878.

Object.—To advance the science of jurisprudence, promote the administration of justice and uniformity of legislation throughout the Union, uphold the honor of the profession of the law, and encourage cordial intercourse among the members of the American Bar.

Meetings.—Annual meeting of 3 days, usually during the last week in August. At Saratoga Springs until 1888; since then at various cities, alternating customarily with Saratoga Springs. The following sections and auxiliary bodies meet in conjunction with the association: Section of legal education and admissions to the Bar; Section of patent, trademark, and copyright law; Association of American Law Schools; Conference of Commissioners on uniform State laws; Conference of State boards of Bar examiners.

Membership.—About 2,000 (annual dues, $5). In addition to the individual members, any State Bar Association may send 3 delegates to the meeting, and any local Bar Association in States where there is no State association may send 2 delegates.

Publications.

Report for 1878 has title: American Bar Association. Call for a conference; proceedings of conference; first meeting of the association, officers, members, etc.

Appendix to each recent volume contains reports of the sections and auxiliary societies, summary of proceedings of State Bar associations and list of Bar associations in the U. S., with names and addresses of their officers.

Price: $1 per vol.

Also reprints of committee reports, proceedings of auxiliary societies, addresses, and papers.

*Distribution.*—Bar libraries and general libraries in which the reports will be used are furnished, when practicable, with sets of Reports without expense other than express charges.

**American Ceramic Society.**

**Address.**—Secretary: Edward Orton, Jr., Ohio State University, Columbus, Ohio.

**History.**—Founded 1899; incorporated in 1905.

**Object.**—To promote the arts and sciences connected with ceramics by means of meetings and the publication of professional literature.

**Meetings.**—Annual meeting, 1st Monday in Feb., at such place as the Board of trustees may decide. Other meetings as called.

**Membership.**—Members (40 resident and 1 foreign) must be competent to fill responsible positions in ceramics and have suitable qualifications (entrance fee, $10; annual dues, not to exceed $5). Associates (173 resident and 22 foreign) include persons interested in ceramics and the allied arts (entrance fee, $5; annual dues, not to exceed $4).

**Publications.**

Ref.: History of the American chemical society, by Albert C. Hale. (In its Twenty-fifth anniversary. Easton, Pa., 1902.)

Object.—Advancement of chemistry and promotion of chemical research.

Meetings.—Two each year at different places in America designated by the council, one of them during the winter holiday week (usually at time and place of the meeting of the A. A. A. S., in conjunction with Section C.) Section meetings usually monthly.

Membership.—About 2,400 active (annual dues, $5; life composition, $100); 15 honorary. Directory published annually.

Publications.

v. 1 complete in 5 nos., v. 2 in 4 nos. v. 1, no. 1-4 (i. e. pt. 1) also issued together as v. 1, 1877. v. 1, no. 5 (separately paged and forming pt. 2) issued in advance of no. 4.

Continued in:

The Proceedings, which are separately paged in v. 17-27, include reports of the meetings of the sections. v. 19-27 contain, with separate t.-p. and
pagination, Review of American chemical research, v. 3-11, 1897-1905, of which v. 1-7, "contributed by members of the instructing staff of the Massachusetts Institute of Technology," appeared in Technology quarterly, v. 8-14.

Prices: To non-members, $6 per vol.; single nos., 60c. See also advertising pages of Journal.

To be published semi-monthly. Price: $6 per annum.

Distribution.—Exchange with other chemical journals of good standing. Annual subscription to Journal should be sent to the Treasurer, A. P. Hallock, 440 First Avenue, New York City; orders for back numbers should be sent to the Librarian, E. G. Love, 108 W. Fifty-fifth Street, New York City.

Research funds, prizes, &c.—Nichols' medal. Awarded annually by the New York Section to the author who presents to that section the best paper embodying the results of original chemical research. The paper must subsequently be published in the Journal of the society, and must be of sufficient merit to deserve the award of the medal. Competition not restricted. The income from the life-membership fund (established 1898), not required to guarantee the interests of the life members, is set aside as a research fund, from which appropriations may be made by the council for purposes of chemical research.

American Dialect Society.

Address.—Secretary: William E. Mead, Middletown, Conn.

Object.—Investigation of the spoken English of the United States and Canada, and incidentally of other non-aboriginal dialects spoken in the same countries.

Meetings.—In December of each year at time and place of the meeting of the Modern Language Association.

Membership.—About 300 (annual dues, $1; life composition, $25).

Publications.

v. 1 in 9 parts, 1890-96. v. 2 in 6 parts, 1900-03.

Prices: v. 1 complete $5, single parts 60c.; v. 2, each part, $1.

Also leaflets including directions to readers for the purpose of collecting dialect words and expressions, a system for phonetic spelling, constitution of the society.

Distribution.—No exchange. On sale by the Secretary.

American Economic Association.

Address.—Secretary-Treasurer: Winthrop M. Daniels, Princeton University, Princeton, N. J.
History.—Founded at Saratoga, Sept. 9, 1885.

Object.—Encouragement of economic research, especially the historical and statistical study of the actual conditions of industrial life; publication of economic monographs; encouragement of perfect freedom in all economic discussion; establishment of a Bureau of Information designed to aid members in their economic studies.

Meetings.—Annually at time and place fixed by the Council. The recent practice has been to hold meetings at the same time and place as those of the American Historical Association (q. v.).

American Society of Naturalists.

Address.—Secretary: W. E. Castle, Harvard University, Cambridge, Mass.

History.—Founded at Springfield, Mass., April 10, 1883, as Society of Naturalists of the Eastern United States. Present name since Dec. 29, 1885. Amalgamated in Dec. 1902, with the Naturalists of the Central States (organized 1901), the latter society becoming the Central Branch of the general society. A physiological section of the Central Branch held its first meeting Mar. 31-Apr. 1, 1905, at Chicago.

The following societies are affiliated:

Object.—Association of working naturalists for the discussion of methods of instruction, museum administration, and other subjects of general interest to investigators and teachers of natural science; adoption of such measures as shall tend to the advancement and diffusion of the knowledge of natural science.

Meetings.—Annually during convocation week (December) at different places. The Central Branch and its affiliated societies hold a meeting annually in the spring.

Membership.—Limited to persons professionally engaged in some branch of natural history. 380 active (annual dues, $1); 3 honorary (limited to 5).
Publications.
Contain lists of members, etc., and proceedings of the business meetings only. Other proceedings of the society are published in "Science" as soon after the annual meeting as possible.
Distribution.—A limited number distributed on request.
Research funds.—Occasional contributions toward maintaining research tables at the Marine Biological Laboratory at Wood’s Holl, and at the Zoological Station at Naples.

American Society of Naval Engineers.
Address.—Navy Department, Washington, D. C.
History.—Organized in 1889 among members of the Engineer Corps, with associate members among interested engineers, shipbuilders, and others. Membership extended in 1899 to include all officers or ex-officers, active or retired, of the Line, Construction Corps, and of the Revenue Cutter Service.
Object.—Promotion of a knowledge of marine engineering and naval architecture by reading, discussing, and publishing papers on professional subjects; by bringing together the results of experience acquired by engineers in all parts of the world, and by collecting and preserving the results of such experimental and practical research as may be deemed essential to the advancement of the science.
Meetings.—Annual meeting in Washington, D. C. Other meetings at such times and places as may be arranged.
Membership.—274 members and 270 associates (annual dues, $5); 9 honorary members.
Publications.
Price: $1.25 per quarterly number, plus postage.
Distribution.—Exchange. On sale by the Secretary-treasurer.
Prizes.—Life membership, with gold medal and cash prize of $75, awarded each year to the author of the best article published in the Journal.

American Society of Refrigerating Engineers.
Address.—Suite 806, 258 Broadway, New York, N. Y. Secretary: William H. Ross.
Object.—To promote the arts and sciences connected with refrigerating engineering.
Meetings.—Annual meeting in New York City in Dec. Other meetings at such time and place as the council may appoint.
Membership.—76 members and 40 associates (entrance fee, $5; annual dues, $10); 3 juniors (entrance fee, $5; annual dues, $5).

Publications.

American Society of Vertebrate Palaeontologists.

Address.—Secretary-Treasurer: Frederick B. Loomis, Amherst College, Amherst, Mass.

History.—Founded Dec. 31, 1902, as the American Palaeontological Society, Section A, Vertebrata (in the expectation that a section would also be formed by those interested in invertebrate paleontology); present name adopted in 1904.

Object.—To promote intercourse among those interested in paleontology; to stimulate scientific investigation and to increase the facilities of those working in this field.

Meetings.—Annually at same time and place as the American Society of Naturalists, except when the executive committee arranges otherwise.

Membership.—$1 (annual dues, $1), consisting of active workers in paleontology.

Publications.

American Society of Zoologists.

Address.—Secretary-Treasurer, Eastern Branch (1906) : Henry S. Pratt, Haverford College, Haverford, Pa.; Central Branch (1906) : T. G. Lee, University of Minnesota, Minneapolis, Minn.

History.—Formed in Washington, Dec. 30, 1902, by the union of the American Morphological Society (organized 1890) and the Society of American Zoologists, or, according to its projected constitution, the Zoological Society of America (just completing its organization at the time of the union), the former becoming the Eastern Branch and the latter the Central Branch of the new organization.

Ref.: Constitution of the American society of zoologists, 1903, Preface, p. 3-11.

Object.—The association of workers in the field of zoology for the presentation and discussion of new or important facts and problems in that department of science, and for the adoption of such measures as shall tend to the advancement of investigation in that science in this country.

Meetings.—Triennial meeting of the society, alternating in the territory of the two branches, unless by agreement of the executive committees of the branches the time or place be changed. Annual meeting of each branch at time and place determined by the executive committee. In practice, during convocation week in conjunction with the A. A. A. S.

Membership.—98 in the Eastern branch; 39 in the Central branch; 9 active in both branches. Annual dues, $1; life membership, $15.
Publications.
None. Reports of the proceedings at the annual meetings are printed in Science.

Abstracts of proceedings of the American morphological society were printed in the Biological bulletin, Wood's Holl.

Research funds.—Occasional contributions toward maintenance of research tables at the Zoological Station at Naples, and the Marine Biological Laboratory, Wood's Holl, Mass.

American Sociological Society.
Address.—Secretary: C. W. A. Veditz, George Washington University, Washington, D. C.

History.—Founded in Dec. 1905.

Object.—Encouragement of sociological research and discussion, and the promotion of intercourse between persons engaged in the scientific study of society.

Meetings.—Annually at different places usually during the Christmas holidays.

Membership.—About 100 (entrance fee, $3; annual dues, $3; life composition, $50).

Publications.

Archaeological Institute of America.

*Address.*—President: Thomas Day Seymour, Yale Univ., New Haven, Conn. Secretary: Francis W. Kelsey, Univ. of Michigan, Ann Arbor, Mich.

For names and addresses of secretaries of affiliated societies, see latest annual report in American journal of archaeology.

*History.*—Founded at Boston in 1879; incorporated by act of Congress, May 26, 1906. Consists of the following affiliated societies: Boston (1879), New York (1884), Baltimore (1884), Pennsylvania (1889), Chicago (1889), Detroit (1889), Wisconsin (1889), Cleveland (1895), Connecticut (1898), Washington, D. C. (1902), Iowa (1902), Pittsburgh (1903), Southwest, including Southern California, Arizona and New Mexico (1904), Colorado (1904), Cincinnati (1905), Kansas City (1906), St. Louis (1906), Rochester (1906), Utah (1906), San Francisco (1906), Northwest (1906). In 1881, the Institute founded the American School of Classical Studies at Athens (*v. infra*), and in
1895 the American School of Classical Studies at Rome (v. infra). It cooperated also in the establishment in 1900 of the American School for Oriental Study and Research in Palestine (v. infra). A Committee on American Archaeology was created in 1899 and a Committee on Art (now the Committee on Mediaeval and Renaissance Studies) in 1904. The Institute has excavated the site of ancient Assos in the Troad and made explorations in Crete, has directed the Wolfe expeditions to Babylonia and to Asia Minor, and has made special investigations in Mexico, New Mexico and among the Indians of the Southwestern United States.

Object.—To promote and direct archeological research, by aiding in the maintenance of schools for archeological study, sending out expeditions for special investigation, assisting the efforts of independent explorers, publishing the results of exploration and research, holding general meetings for the reading and discussion of papers on archeological subjects, and by disseminating exact information in regard to the progress of research by means of free public lectures under the auspices of the affiliated societies.

Meetings.—Annual meeting of the Council, 2d Saturday in May. General meeting for the reading and discussion of archeological papers, appointed ordinarily for the week which includes Jan. 1. Annual meeting of each of the affiliated societies, held in most cases during the 1st week of Nov.

Membership.—1,201 annual members (dues, $10); 164 life members ($100); 8 foreign honorary (limited to 10). All payments are made to the affiliated societies, 10% being retained by them for local uses. Any local archeological society consisting of not less than 25 members of the Institute may, by vote of the Council, be affiliated with the Institute.

To be issued in 5 pts. Price: $5 a pt.
Published jointly by the Institute and the Society for the promotion of Hellenic studies, London. 200 copies printed.
Price: $35 in portfolio; $36.75 in half morocco.
Distribution.—Exchange with publications of archaeological and philological societies. All the publications of the Institute and of the School at Athens (except as follows) may be procured through Macmillan & co., 66 Fifth Avenue, New York City. The Argive Heraeum may be procured through T. D. Seymour, Yale University, New Haven, Conn., or from the publishers, Houghton, Mifflin & co., Boston, Mass. Subscriptions for Investigations at Assos received in America by W. F. Harris, Harvard University, Cambridge, Mass.; in Great Britain by B. Quaritch or H. Sotheran & Co., London; on the continent of Europe, by Karl W. Hiersemann, Leipzig. Correspondence in reference to the Facsimile of the Codex venetus marcianus 474 of Aristophanes should be addressed to John Williams White, Harvard University, Cambridge, Mass.

Research funds, etc.—The Institute maintains the following fellowships, the first three being administered by the Managing Committees of the respective schools: (1) and (2) Institute fellowships, of the annual value of $600 each, at the American Schools at Athens and Rome. (3) Thayer fellowship, of the same value, at the American School in Palestine. These are awarded chiefly on the basis of competitive written examinations, which are held in March of each year in Athens, in Rome and at any of the universities or colleges represented on the Managing Committee of one of the three schools. For the subjects of the examinations, with a definition of the requirements in each, and the papers set in the examination of the previous year, see the Supplement to the latest volume of the American journal of archaeology. Circular issued each year by the Institute, giving dates of examinations and special conditions to be fulfilled, sent on application. (4) Fellowship in American archaeology. A travelling fellowship, $600 a year, established in 1899. (5) Fellowship in Mediaeval and Renaissance studies. Established in 1905 at the American School in Rome, with a stipend of $600.

American School of Classical Studies at Athens.
Address.—Athens, Greece. Director: B. H. Hill. Communications should be sent to the Chairman of the Managing Committee, James R. Wheeler, Columbia University, New York City.
History.—Founded by the Archaeological Institute of America in 1881; opened in 1882; incorporated in 1886. Supported by the cooperation of leading American universities and colleges which are represented on the Managing Committee in charge of the school. The title to the school's permanent fund and other property, including its building, is vested in an incorporated Board of Trustees. The most extensive excavations of the school have been at the Heraeum in Argos and at Corinth.

Object.—To furnish to graduates of American universities and colleges and to other qualified students an opportunity to study classical literature, art and antiquities in Athens, under suitable guidance; to prosecute and to aid original research in these subjects; and to cooperate with the Archaeological Institute of America, in conducting the exploration and excavation of classic sites.

Research funds, etc.—2 fellowships in Greek archaeology, $600 each, one granted by the Institute, the other by the Managing Committee, are awarded annually on competitive examination. (For places of examination, etc., v. supra Archaeological institute of America.) The Carnegie Institution of Washington has recently made to the school, for five years, a grant of $1,500 a year in connection with excavation at Corinth and for exploration and a grant of $1,000 a year for a research fellowship in architecture.

AMERICAN SCHOOL OF CLASSICAL STUDIES IN ROME.

Address.—5 Via Vicenza, Rome, Italy. Director: Richard Norton. Communications should be sent to the Chairman of the Managing Committee: A. F. West, Princeton University, Princeton, N. J.

History.—Founded in 1895 by the Archaeological Institute of America. In charge of a self-perpetuating Managing Committee and supported by the cooperation of the corporations and alumni of a considerable number of American universities and colleges and by private contributions. The title to its permanent fund, and other property is vested in an incorporated Board of Trustees.

Object.—To promote the study of classical literature in its bearing upon antiquities and history; of classical, Etruscan and Italic art and archaeology, including topography, palaeography and epigraphy; and of the art and archaeology of the early Christian, the mediaeval, and the Renaissance periods within the boundaries of Italy.

Publications.

Annual reports and papers are published in the American journal of archaeology, 2d ser.

Pub. for the Archaeological institute of America by the Macmillan co.

Research funds, etc.—Two fellowships in classical archaeology of $600 each, one granted by the Institute, the other by the Managing Committee of the school, are awarded annually on competitive examination. A fellowship in Christian archaeology of $600, maintained by subscriptions from various institutions, is offered irregularly. (For places of examinations, etc., see Archaeological institute of America.)
A fellowship in Mediaeval and Renaissance studies with an annual stipend of $600, established by the Institute in 1905, is administered by a committee of which Prof. Allen Marquand, of Princeton University, is chairman, to whom applications should be sent. The Carnegie Institution of Washington has recently made to the school a grant of $1,600 annually for 5 years, for 2 research fellowships in Roman classical archaeology or literature ($800 each) and a grant not to exceed $1,000 a year for 3 years to assist in the publication of results of scientific investigation.

AMERICAN SCHOOL FOR ORIENTAL STUDY AND RESEARCH IN PALESTINE.

Address.—Jerusalem, Palestine. Communications should be sent to the Secretary of the Managing Committee: Charles C. Torrey, Yale University, New Haven, Conn.

Director (appointed annually) 1906/07: D. G. Lyon, of Harvard University.

History.—Established in 1900 under the auspices of the Society of Biblical Literature and Exegesis and the Archaeological Institute of America; not incorporated. Supported by various American colleges and theological seminaries and by individual contribution. The Managing Committee, representing the supporters of the school, meets annually during the Christmas holidays in connection with the Society of Biblical Literature and Exegesis.

Object.—To furnish to properly equipped American students an opportunity to study in Syria, Biblical literature, the history, geography and archaeology of Syria and Palestine, and the ancient and modern languages of the country; to prosecute and aid original research; and to contribute (as opportunity may offer) to the advancement of knowledge in these subjects.

Research funds, &c.

BACHE FUND. Founded by bequest of Alexander Bache (d. 1867) for the "prosecution of researches in physical and natural science, by assisting experimentalists and observers in such manner and in such sums as shall be agreed upon" by a cooperative board of 3 directors, the original members of which were selected by the testator.
Amount in Apr. 1902, $50,997.80.

Watson Fund. Established by bequest of Professor James C. Watson (d. 1880) for the promotion of astronomical science. The particular objects and work to be aided by this fund are determined by a board of 3 trustees, subject to the approval of the Academy. The original board was appointed by Professor Watson, vacancies to be filled by the Academy. The income of the fund has been applied to (1) awarding from time to time a gold medal of the value of $100 accompanied by $100 in gold, to persons in any country making an astronomical discovery or producing an astronomical work worthy of special reward and contributing to the progress of astronomy; (2) setting aside annually the sum of $500, or as much thereof as may be necessary and available, for work on the smaller planets discovered by Professor Watson.
Amount in 1902, $22,000.
HENRY DRAPER FUND. Original fund $6,000 conveyed to the Academy in 1883 by Mrs. Mary A. P. Draper for the establishment of the Henry Draper medal, a gold medal of the value of $200 to be awarded every two years for the most important discovery in astronomical physics, preference to be given, in case of discoveries of equal importance, to that made by a citizen of the United States. If the medal is not awarded, the fund is to be applied to investigations in the same department of science made by a citizen or citizens of the United States. The management and control of the fund vests in the Academy, which has created a committee upon it.

Amount in Apr. 1902, $7,903.75.

SMITH FUND. A sum of $8,000 conveyed to the Academy in trust in 1884 by Mrs. Sarah J. Smith, in memory of her husband, Dr. J. Lawrence Smith, the income to be used for striking and awarding from time to time (not less than 2 years) a gold medal of the value of $200 for important original investigations of meteoric bodies, preference to be given, in case of investigations of equal importance, to one made by a citizen of the United States. Income not needed for this purpose may be used in aid of investigations of meteoric bodies, to be made by a citizen or citizens of the United States. The management of the fund vests in the Academy, which has created a permanent committee upon it.

Amount in 1902, $8,235.

JOSEPH HENRY FUND. A sum of $40,000 contributed by friends of Professor Henry in 1878 and invested for his benefit, the income to be paid to him during his natural life, and after his death to his wife and daughters. After the death of the last survivor, the fund is to be delivered to the Academy, and held by it in trust, the income to be applied from time to time in its sole discretion "to assist meritorious investigators, especially in the direction of original research." (Not yet available.)

WOLCOTT GIBBS FUND. A sum of $2,600 presented to Dr. Gibbs on his 70th birthday, Feb. 1892, the income to be devoted to the prosecution of chemical research. Given by Dr. Gibbs to the Academy in trust, the disposition of the income vesting in a coöperative board of 3 directors, 2 of whom must be members of the Academy. By vote of the board the income from the fund is to be paid to Dr. Gibbs during his life.

BENJAMIN APHTHORP GOULD FUND. A sum of $20,000, conveyed to the Academy in trust in 1897 by Miss Alice B. Gould in memory of her father, for the prosecution of researches in astronomy. Income
under control of a cooptative board of 3 directors, of whom two at least must be members of the Academy. Original board appointed by the trust deed.

Harvard University.

History.—Founded by the General Court of Massachusetts Bay in 1636. Two years later it received a bequest from John Harvard, a non-conformist clergyman and in his honor it was named Harvard College. The title of University dates from the year 1780, when the Massachusetts Constitution of that year referred to "the University at Cambridge." The property and government of the University is vested in a co-optative board of seven persons, officially styled the President and Fellows of Harvard College (but more commonly known as The Corporation), established by the charter granted in 1650. Its acts are alterable only by the Board of Overseers. The latter body was established in 1642, but its constitution has undergone several changes. It consisted of representatives of the State and ministers of the Congregational church up to 1843 when it was freed from the control of a particular denomination; the requirement that a portion of the membership should be chosen from the clergy remained, however, until 1851. It was entirely separated from the State government in 1865 and since then its members have been elected by graduates of the university of five years' standing.

Prizes.

Boyden Premium. A sum of $1,000 to be awarded to "any resident of North America who shall determine by experiment whether all rays of light, and other physical rays, are or are not transmitted with the same velocity." (North America has been defined as including the West Indies, and extending to the southern boundary of Mexico.)
The problem has been more definitely stated by the Board of Managers thus: "Whether or not all rays in the spectrum known at the time the offer was made, namely March 23, 1859, and comprised between the lowest frequency known thermal rays in the infra-red and the highest frequency known rays in the ultra-violet, which in the opinion of the committee lie between the approximate frequencies of \(2 \times 10^{14}\) double vibrations per second in the infra-red and \(8 \times 10^{14}\) in the ultra-violet, travel through free space with the same velocity."

The original sum of $1,000 has increased to about $3,000. One award of $1,000 made in 1907 for a partial demonstration of this problem, viz: for the ultra-violet rays.

Smithsonian Institution.

Address.—Washington, D. C. Secretary: Charles D. Walcott.

History.—Founded by act of Congress approved Aug. 10, 1846, in accordance with the bequest of James Smithson, of London, England, who gave his property to the United States of America "to found at Washington, under the name of the Smithsonian Institution, an Establishment for the increase and diffusion of knowledge among men." The statutory members of the Establishment are the President, the Vice-President, the Chief Justice, and the heads of Executive Departments. The business of the Institution is conducted by a Board of Regents, consisting of the Vice-President and the Chief Justice of the United States as ex officio members, three members of the Senate, three members of the House of Representatives, and six citizens, "two of whom shall be resident in the city of Washington; and the other four shall be inhabitants of some State, but no two of them of the same State." The library of the Institution was removed to the Library of Congress in

Smithsonian contributions to knowledge. v. I-XXVI, XXVIII-XXXIII. Washington, D. C., 1848-1904. fol.

2 pts. of v. 27, i. e. nos. 801, 884, by the late S. P. Langley, issued 1891-93 (2d ed. of no. 801 pub. 1902; the rest of the volume reserved for other papers of the same author); 4 pts. of v. 34, i. e. nos. 1438, 1459, 1651, 1692, issued 1903-07; 2 pts. of v. 35, i. e. nos. 1718, 1723, issued 1907.

"Restricted to the publication of positive additions to human knowledge resting on original research." Each memoir has special t.-p. and is issued separately in advance of the volume of which it forms a part.

5 pts. of v. 49 issued 1905-07.

v. 1-44, 49, 49 are made up of miscellaneous separate publications issued at irregular intervals, including tables, instructions for collecting and digesting facts and materials for research, lists and synopses of species of the organic and inorganic world, bibliographical works, etc.

v. 45, 47-48 (and v. 50 in progress) published in quarterly numbers, designated as Quarterly issue, v. 1-4 and intended as a medium for the early publication of the results of researches and for reports of a preliminary nature (also reprinted separately).

°A system of international exchanges was begun by the Institution in 1850 for the free interchange of scientific publications between institutions and investigators in the United States and those in foreign lands. Since 1867 this has been the official channel for the transmission of United States documents to foreign governments in exchange for their official publications. Ref.: History of the Smithsonian exchanges, by G. H. Boehmer. (In Annual report of the Board of regents for 1881, p. 703-810.)—The international exchange system, by W. C. Winlock. (In The Smithsonian institution, 1846-1896. The history of its first half century. Washington, 1897, p. 397-418.)—The international exchange list of the Smithsonian institution. Washington, 1904. 8°.
Submitted annually to Congress and published also as Congressional documents. Since 1884 the report of the U. S. National museum forms a separate volume. (v. infra).

1846-53, reports only; 1854 to date, reports and a general appendix giving a record of the progress in different branches of knowledge, compiled largely from journals in foreign languages and the transactions of learned societies throughout the world (each paper being issued also as a reprint).

Include the following issued also separately in advance.

The first six reports are reprinted in an appendix to the 8th annual report of the Board of regents (for 1853).

Also various special publications, some of which bear the series title "Smithsonian miscellaneous collections" or "Smithsonian contributions to knowledge," but are not included in the completed volumes of these series.

With the exception of 17 early publications (1846-53), Shea's Library of aboriginal American linguistics (9 vols., 1861-64) and 2 recent pamphlets, which are listed as A-Z, AA, AB, each volume, part, reprint or special publication has a serial number assigned to it. Titles are given in numerical order in List of publications . . . 1846-1903, by W. J. Rhee (1903; in Sm. misc. coll. v. 44) which contains also tables showing contents of volumes of "Contributions," "Collections" and "Reports."

Distribution.—The volumes of Contributions and Miscellaneous collections are distributed only to designated public libraries and to learned institutions and societies. A small edition of the separate papers in these two series is printed for sale or exchange. The Annual reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remains to supply demands from other sources; they are also sold at cost by the Superintendent of documents, Government printing office, Washington, D. C., and each member of Congress has a certain number of copies at his disposal. The papers printed in the Annual reports are published separately for free distribution. Applicants for publications should state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested. No sets of publications are for sale or distribution, as most of the volumes are out of print. For prices, see Classified list of Smithsonian publications available for distribution, Apr. 1907. Washington, 1907. 8°.

Research funds, prizes, &c.—The permanent fund of the Institution amounts to about $1,000,000, mainly deposited in the Treasury of the United States and bearing interest at 6% per annum. It is derived from the Smithson endowment, with savings and interest, and subsequent gifts and bequests, notably those of Thomas G. Hodgkins of Setauket, Long Island, N. Y., amounting to over $250,000. Grants are made by the Institution for various explorations and investigations; in particular, the income from $100,000 of the Hodgkins Fund
is used to promote the study of "the nature and properties of atmospheric air in connection with the welfare of man" by grants in aid of researches and by the award of the Hodgkins Gold Medal for important contributions to knowledge in this field. Appointments are made by the Institution to a table which it supports at Naples Zoological Station.

U. S. NATIONAL MUSEUM.

Address.—Washington, D. C. Assistant Secretary of the Smithsonian Institution, in charge of Museum: Richard Rathbun.

History.—By its act of incorporation (1846) the Smithsonian Institution was made the custodian and the only lawful place of deposit, of all objects of art and of foreign and curious research and all objects of natural history, plants and geological and mineralogical specimens belonging to the United States. In 1858 the collections of the Wilkes Exploring Expedition and various government surveys were transferred from the Patent Office to the Institution and appropriation was made by Congress for their care and maintenance. The name National Museum first appears in an act of Congress in 1875, although it had then been in popular use for several years. In 1876, at the close of the Centennial Exposition at Philadelphia, large collections from the exhibits of foreign governments were secured for the museum and Congress made provision for the erection of a separate building which was opened to the public in 1881. A new building, provided for in 1903, is now in course of erection.

Publications.

Reprinted from Smithsonian reports for 1881-83.

Also issued as Congressional documents.

Include reports of the Assistant Secretary [prior to 1886, Assistant Director] and curators; and papers, chiefly of an ethnological character, describing collections in the museum (also issued separately).

Bean) in 2 pts., text and atlas of plates, issued also as Smithsonian contributions to knowledge, v. 30-31. —no. 4 (American hydroids, by C. C. Nutting) pt. 1-2 issued 1900-04 (2 vols).

v. 10 in progress, pt. 1-6 pub. 1906-07.

The United States National Herbarium, which was founded by the Smithsonian Institution, was transferred in 1868 to the U. S. Department of Agriculture and continued to be maintained by that department until July 1, 1896, when it was returned to the official custody of the Smithsonian Institution. The Department of agriculture, however, continued to publish the Contributions until on July 1, 1902 the National museum, in pursuance of an act of Congress, assumed responsibility for the publication.
Circulaires . . . no. 1-51. 1881-1901. 3°.

Intended to bring to immediate notice urgent wants of the museum or to promulgate special information with the least possible delay. no. 1-33, 37 repr. in Proc. v. 4, 6-8, 10; no. 35 in Report 1886.

For contents of the above series and further bibliographical details, see Bulletin no. 51 and suppl.

**Distribution.**—A certain number of copies of each Report is assigned to the Museum for distribution to libraries, to correspondents, and to contributors to the collections, while a considerable part of the edition is distributed by members of Congress. The special papers reprinted from these volumes are furnished free to those interested. The volumes of Proceedings are sent only to libraries, while the separate papers are furnished without charge to specialists and others engaged in scientific work. The Bulletins are intended principally for libraries, but are also given to known specialists working on the groups to which they relate. None of the above-mentioned publications are sold by the Museum; but when it cannot supply them, persons desiring to purchase are advised to write to the Superintendent of documents, Government printing office, Washington, D. C. Occasionally the Museum exchanges its publications for desirable specimens.

Address.—Calle Perú 208, Buenos Aires. Director: Florentino Ameghino.

History.—Founded in 1823 as Museo público de Buenos Aires in connection with a school for instruction in the physical sciences, from which it was separated in 1826. Brought into intimate relations with the University through the foundation in 1854 of the Sociedad de Amigos de la Historia Natural del Plata, whose object was to secure the growth and development of the museum, and whose president was the Rector of the University, ex officio. Under the administration of Dr. Burmeister (appointed director in 1862) the museum was transformed from a simple cabinet of natural objects and curios into a scientific institution, especially noteworthy for its ornithological, entomological, and paleontological collections. Dr. Burmeister was succeeded, upon his

retirement in 1892, by Dr. Berg, formerly director of the Museo
nacional de Montevideo, who undertook the reclassification of the
museum on modern lines, and the installation of herpetological, ichthy-
ological and biological collections. The present director succeeded Dr.
Berg upon the death of the latter in 1902. The museum is at present
divided into 5 sections: (i) Sección zoológica, (ii) Sección paleon-
tológica, (iii) Sección etnológica, (iv) Sección botánica, (v) Sección
géologico-mineralógica. It maintains two exploring parties in the
field, one for zoology and botany, the other for geology, mineralogy
and paleontology, by means of funds supplied by the national gov-
ernment. It has also a large library. The present name was assumed
when, after the federalization of Buenos Aires in 1880, the museum
passed from the control of the provincial government into the hands
of the nation.

Universidad Mayor de San Marcos.

Address.—Lima.

History.—Founded in 1553 in pursuance of royal decree of May 12, 1551, approved and confirmed by papal bull of July 25, 1571. At first established in the Convento del Santo Domingo, it was afterwards transferred to San Marcelo, later (in 1576) to the building now occupied by the Chamber of deputies, situated in Calle de la Universidad, and lastly to the Colegio de San Carlos, where all the faculties are now located except those of theology and medicine, which are provided with separate buildings. During the early years of the republic the functions of the university were limited to conferring degrees in the juridical sciences. It was re-installed in 1861 under new statutes, revised in 1876.

Elizabeth Thompson Science Fund. By the conjoint action of the National Academy of Sciences and of the trustees of this fund a table has been secured permanently for the use of American investigators desiring to work at the International Scientific Station on Monte Rosa. This station offers facilities for work in physics, meteorology and physiology, but any appropriate research may be carried on there. The right of appointment to the American table vests in the trustees of the Thompson fund. Applications for appointment should be addressed to the Secretary, Dr. Charles S. Minot, Harvard Medical School, Boston, Mass. (Science, April 17, 1908, p. 639.)

Engineering Association of the South. Proceedings. v. XVII-XVIII, 1906-07.—The Engineering Society of the Carolinas became a section of the association, at Charlotte, N. C., in Dec. 1907. A section has also been established at Atlanta, Ga.

National Academy of Sciences. Cyrus B. Comstock fund of $10,000 in 4% railroad bonds, presented to the Academy Nov. 27, 1907. Out of the income of this fund a prize in money, to be called the Comstock prize, is to be awarded once for every 5 years to the bona fide resident of North America who, not less than one year nor more than six years before the award, shall have made, in the judgment of the trustee, the most important discovery or investigation in electricity or magnetism or radiant energy. The amount of the prize is to be two-thirds of the balance of income for 5 years, after provision for maintaining the market value of the fund has been made, if necessary. If not awarded, this sum is to be added to the principal or it may be used, not oftener than once in 15 years, in whole or part, to aid investigations in the same field to be made by a bona fide resident or residents of North America. (Ann. rep. 1907, p. 13-14.)
